

Website Proposal for How Much Air & Home Improvements

For: Andy | From: Milton | Date: August 2026

THE SHORT VERSION

Right now your online presence is hurting you. Two sites are fighting each other, and one does not even say you are an HVAC company anymore.

This proposal fixes that with one strong website, a real customer portal, a real owner admin, payments, texts, emails, and an AI helper.

Your family price: \$1,500

Normal fair price for this work: about \$27,500

You save about \$26,000 because we are family.

Your pain right now

You have two websites that pull people in two directions.

SITE 1 - YOUR REAL BRAND

trusthowmuch.com

This is the domain people already know. It is tied to How Much Air & Home Improvements.

SITE 2 - THE OTHER COMPANY'S SITE

askhowmuch.work/home

Another company set this up as a different web address instead of using the domain you already had.

That created a mess:

- Google and customers now see **two places**, not one clear home
- Your own sites are basically **competing against each other**
- After you stopped working with that company, they changed the site
- It now shows a **concrete company in Texas**, not your HVAC business
- Anyone who lands there sees the **wrong business, wrong city, wrong trade**

What that means: people may find the wrong thing, trust gets broken, and old links or ads can send people to a dead end. You are paying for confusion instead of getting more jobs.

Outcome of this project: one clear home online. Your name. Your trade. Your cities. No concrete company stealing your attention.

What you get

1. One clean company website

A modern How Much website for phones and computers

- built for trust and quotes.

- Home, services, cities, about, team, projects
- Blog, FAQs, booking / quote, financing
- Maintenance, warranty, second opinion
- Contact, reviews, partners, ads page

Outcome: People land on the right site and ask for help.

2. Fix the two-website problem

- Make **trusthowmuch.com** the one true home
- Stop damage from the old subdomain site
- Redirects / cleanup when we can
- Get HVAC info in front of Google again

Outcome: Your brand stops fighting itself online.

3. Built to be found (SEO)

- Sitemap and clean page structure
- City and service pages that can rank
- Blog SEO pieces

Outcome: A better chance people searching for HVAC near you find you.

Ranking takes time. This builds the foundation.

4. Real customer portal

Real logins for your customers - not a fake sample forever.

- Jobs / projects, messages, documents
- Request service and pay invoices online

Outcome: Fewer lost texts. Fewer "Where's my paperwork?" calls.

5. Real owner admin + AI helper

Your private business control room.

- Paid / unpaid / overdue money view
- Invoices, schedule, messages, leads
- AI helper for cash, jobs, and follow-ups

Outcome: Run the business from one place.

6. Real payments, texts, and emails

- Online payments for invoices / deposits
- Text and email alerts for quotes and updates
- Messages tied to portal and admin

Outcome: Customers pay easier. You chase less.

7. Design that matches your brand

Your How Much look - logo, colors, clean and trustworthy style.

Outcome: Feels like your company, not a cheap template or someone else's concrete business.

Price breakdown

These are normal fair prices for this kind of full custom build.

Piece	What you get	Normal price
Main marketing website	Full site: services, cities, about, team, blog, booking, trust pages	\$8,500
Domain cleanup + SEO	One true home on trusthowmuch.com + search setup	\$2,500
Ads landing page	Page built to turn ad clicks into quotes	\$1,000
Real customer portal	Real logins, jobs, docs, messages, service requests	\$5,500
Real owner admin + AI	Money, invoices, schedule, leads, AI helper	\$5,000
Payments + texts/emails	Online pay + real SMS/email follow-ups	\$5,000
Normal total	Full package	\$27,500
Your family price	Same full package	\$1,500

Why the normal price is that high: This is not one pretty page. It is a full website, domain cleanup, customer portal, owner admin, payments, texts/emails, and AI - all built around your brand and real day-to-day work.

What is included

- Everything listed above
- Launch on **trusthowmuch.com**
- Real customer logins
- Real payments
- Real texts and emails
- Owner admin + AI helper
- Help cleaning up the old competing site problem
- A walkthrough so you know how to use it

What success looks like

- 1 People find the right How Much website.
- 2 The old wrong site stops confusing customers.
- 3 People can ask for a quote easily.
- 4 Customers can log in, see their job, and pay.
- 5 You see money, jobs, and messages in one place.
- 6 Texts and emails help you follow up cleanly.

What is not included

These are ongoing costs, not the build itself:

- Paying for ads every month
- Monthly SEO retainers after launch
- Monthly text / email / payment processing fees from those companies
- Unlimited redesigns forever after launch

Next steps

- 1 You review this proposal.
- 2 You say yes to the **\$1,500** family price.
- 3 We launch on **trusthowmuch.com**.
- 4 We clean up the two-site confusion.
- 5 We turn on portal, payments, texts, and emails.
- 6 We do a short walkthrough together.

Payment: Total due \$1,500 | Pay however you prefer (Zelle, cash app, check, or whatever we agree on).

Your current setup is not just "old." It is actively working against you. Two websites. Wrong business info. Wrong trade. Wrong state. This project gives you one clear home online - plus the real tools to run jobs, get paid, and follow up.

I am not charging you what this is worth on the open market. I *am* showing you the real number so you know the value. Questions? Happy to walk through it page by page.

- Milton
